

Construction

Build, renovate, and deliver with a single accountable team.

JCCP handles construction scopes end to end — from feasibility and permitting support through general contracting, fit-out, demolition, and turnover — with disciplined project management at every stage.

Integrated Solutions. Built for Progress.

Capabilities

General Contracting

Full-scope build execution with trade coordination, safety, and quality control.

Fit-Out & Renovation

Retail, office, and hospitality interiors delivered on live-site schedules.

Demolition

Controlled strip-out and structural demolition with waste handling and compliance.

Project Management

Programme, cost, and contractor oversight from mobilisation to turnover.

Project Consultation

Scope definition, buildability review, and budget validation before you commit.

What you get

- Single point of accountability across trades
- Transparent programme and cost reporting
- Documented turnover and as-built handover

Frequently asked questions

What project sizes does JCCP take on?

We deliver scopes from single-unit retail fit-outs through multi-floor office builds and industrial works. If a scope is outside our capacity, we say so during consultation rather than after award.

Can you work in occupied or operating premises?

Yes. Live-site works are sequenced around your operating hours with dust, noise, and access controls agreed before mobilisation.

Do you assist with permits and compliance?

We support permit documentation and coordinate with the relevant authorities and building administrators as part of project management.

How is progress reported?

Clients receive a regular progress report covering programme status, completed works, site photos, variations, and upcoming activities.

Talk to JCCP

Share your scope, site, and target timeline and we will come back with a structured recommendation. Contact details are available on the JCCP website contact page.
